DETAILED ACTION

Response to Amendment

1. This action is in response to the RCE dated July 26, 2003 with the amendments to claims 1-2 and 13.

Claims 1-15 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 13 and all dependent claims depending on claims 1 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The phrase "the analog signal identifies a unique copy of the digital work" in claim 1 and the phrase "that is noticeably different from the one of said sequential data objects when the one data object and the alternate data object are reproduced in analog form" in claim 13 are not properly described in the application as stated in the remarks (page 8, lines 1-7; page 2, line 22 – page 3, line 3).

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2137

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. The term "artistically equivalent" in claim 1-4, 8 and 13 is a relative term which renders the claim indefinite. The term "artistically equivalent" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. There is no standard by which the two members are close together to be artistically equivalent.

Specification

6. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specifications are not clear on "the analog signal identifies a unique copy of the digital work" and "noticeably different from the one of the sequential data objects when the one data object and the alternate data object are reproduced in analog form".
